

## UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 10  
DEC 23 1986REPLY TO  
ATTN OF:

M/S 525

## MEMORANDUM

SUBJECT: Pasco, Washington, Sampling Effort

FROM: Lori Cohen *L. Cohen*  
Superfund Site ManagerTO: John Osborn, Chief  
Field Operations Office

The Superfund Branch requests technical support for the following field activities in Pasco, Washington, which should be scheduled in January or early February 1987.

*domestic wells* [ 1. The ~~the~~ <sup>seven</sup> drinking water wells that were sampled in October 1986 by Jim Hileman and Marcia Knadle must be resampled for organics and for lead (one well also for chromium). *(2 pumps - one for filter)*

*only at couple of wells* [ 2. The <sup>(#)</sup> monitoring wells at the Pasco Sanitary Landfill that were installed by Ecology and Environment (E&E) in the summer of 1985 should be resampled for organics and inorganics. Procedures should be incorporated into the sampling program to determine the effects of sediments on the sample results. *filtering / Non-filtering*

*to effect organ* [ 3. Finally, EPA must address the disposal of the drums of material from the E&E sampling effort.

- The drums should be sorted as to whether they contain or may contain hazardous wastes.

- The non-hazardous drums should be disposed of in the landfill under the direction and permission of the landfill owner/operator.

- The drums that may contain hazardous waste should be sampled for EP toxicity, and stored safely on-site. *(work plan) → incl. this*

*for domestic well for - Savage & Sons (Marcia)* I will be happy to discuss the detail and scope of this work with you or your staff. Please notify me as to who will be assigned to manage this work assignment.

Thank you!

cc: Marcia Knadle

*Memo format**drinking H<sub>2</sub>O well - just give EPA data / → Memo**Other info - landf. well data - Conclusions - please / on.*
